VAST RANGE HI-TECH IN NEW PREMISES

High technology products combined with good old fashioned service is the key to South East Electronics rapid expansion over the last 12 months. This culminated recently in a move to more modern premises in the new 'Andrew-st Arcade'.

The range of products stocked has been vastly increased and now covers a diverse and unusual field with the accent on quality, originality and utility. From advanced C-B or UHF two way radios to dynamite mobile sound systems you're sure to find value for money.

There is also a range of superb domestic HI-FI stereo equipment on display by J.B.L., Shure, AIWA, ROTEL, SONY and other legendary manufacturers.

Access

Being Dick Smith agents also means access to a veritable 'Pandora's Box' of miscellaneous electronic equipment with wide applications. There are also kits and tools for the hobbyist and enthusiast.

Chris Darker the manager has had many years of experience in the electronic and music industry and together with the proprietor Kym Trevan and apprentice Gordon Caulson you can be assured of professional and knowledgeable service.

Specialists

South East Electronics are also solar energy specialists and have a fascinating system of electricity generation on display.

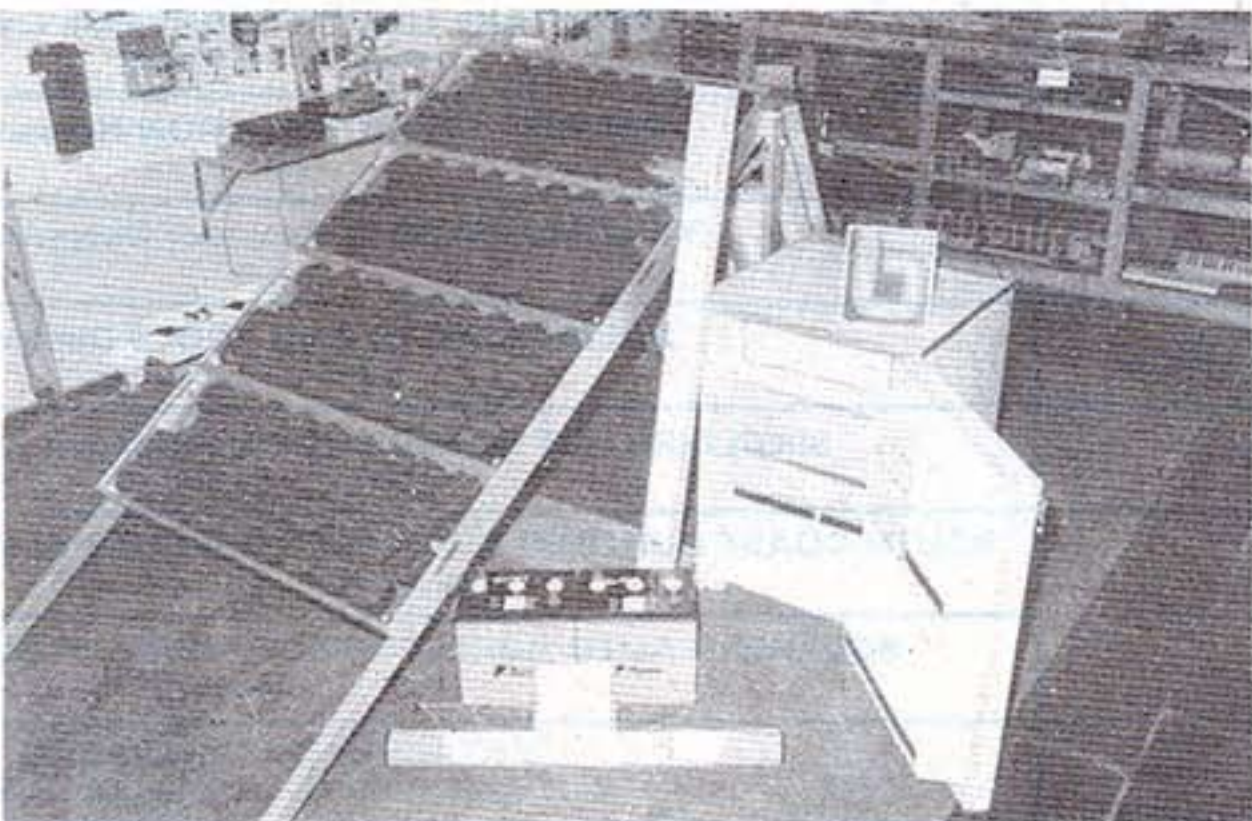

Panels of specially treated crystal convert the sun's rays into safe, low voltage electricity for a multitude of uses.

Chris has started a project to convert the entire shop to solar generated power by Christmas. Interested persons are more than welcome to enquire for details.
